

Does FREE mean free?

It is "Always On" until you hit the ceiling as in the example below. Then you will experience a tortoise speed after 6GB of mobile data consumption. Tethering, i.e. sharing Internet access over your phone's WiFi hotspot, was not mentioned. But it'll only speed up the usage if it does, until your patience erodes after slow speed kicks in to an extent that it is no longer bearable.

Bingle! You might consider renewing the data package sooner than it should be.

Order your Free SIM

 **= Always On*** + **Unlimited** + **Unlimited**
data minutes texts

+ Free calls & texts to other giffgaff numbers

*Speed restrictions apply to our Always On data. After 6GB of data used you'll experience a reduced data speed of 384kbps from 8am to Midnight. You may notice that activities which require high amounts of data, like HD video streaming, will be slower.

What is Always On?

With Always On you get 6GB of data at full 4G speed. After 6GB of data used you'll experience a reduced data speed of 384kbps from 8am to Midnight. You may notice that activities which require high amounts of data, like HD video streaming, will be slower. While roaming in the EU and selected destinations once you've used 6GB of data you'll be charged at 0.78p/MB.
